

## SCIENTIA FELLOWS – Personal letter

### Personal letter explaining why you are interested in the Programme (max. 700 words – 1.5 pages\*)

*\* Here and further in the application, the number of words should be treated as an indicative length of the written text. 400 words is approximately 1 page.*

Please provide your personal motivation and the reasons why you are interested in the Programme. Please, include:

- **Experience** - your own experience in the field of your research topic (i.e. the most important results: these may include funded projects, publications, patents, reports, invited participation in conferences, etc.)
- **Added value** - explain what contribution your research will make to enhancing any existing research project or how it will advance the state of the art in your chosen field.
- **Impact and relevance** - benefits to the research community, society or industry in general that will arise from your project. For instance, what will be possible as a result of your research that is not possible now?
